

Our vision for the Steeplechase Cancer Center is to offer the full continuum of cancer care close to home with an enhanced facility that includes our own medical oncologists, surgical oncologists, and radiation oncologists and optimizes the benefits of our partnership with Rutgers Cancer Institute of New Jersey, the state's only National Cancer Institute — Designated Comprehensive Cancer Center.

Since it opened, the Steeplechase Cancer Center has centralized all outpatient cancer care services in one location, including radiation therapy, PET CT, infusion therapy, the Medical Center's oncology research team, oncologists' offices, the Sanofi US Wellness Boutique, complementary medicine services, nutritional counseling and the Sanofi US Breast Care Program, which has been named a Breast Imaging Center of Excellence by the American College of Radiology.

Through our partnership with Rutgers Cancer Institute we are able to offer patients a range of cancer specialists and the most advanced approaches to cancer treatment, including precision medicine, immunotherapy, complex surgical procedures, sophisticated radiation therapy techniques, and novel clinical trials, many of which are not available elsewhere.

Through donor support, we will continue to expand and grow the cancer services that are vital to the health of our community. **Thanks to gifts like yours, we will be there for all those touched by cancer in our community.**
