

Supporting Referral Sources as they Transition their Patient to LTC

In an effort to better support you as you consider transitioning your patient to Long Term Care or Respite Care, we've developed the below checklist for your convenience.

We are here to partner together, you are not alone.

Contact CSH at together@childrens-specialized.org anytime to learn more about Long Term Care or Respite Care.

Schedule a tour and encourage families to tour! We offer guided virtual and in-person tours of Children's Specialized Hospital to members of our referring community and to all the families we serve.

Guide families towards identifying a Case Manager through their insurance company. For assistance, contact CSH at together@childrens-specialized.org.

For Respite Care, families will need Managed Long Term Services and Supports (MLTSS) to help qualify for supportive services. The family's Case Manager or support staff at CSH can assist.

Gather and share important information regarding your patient so we can better understand their needs (e.g., medical history, medical records, school records, etc.).

Next Steps:

The staff at CSH will conduct a preadmission screening and resident review (PASRR).

The staff at CSH will seek authorization from the families insurance company for admission.

Admission Day! We will notify and work with the family and child to prepare for the day of admission (i.e., checklists, what to expect, answer questions, confirm important details). Our team will meet with the family and child to make sure they're settled in.
